

# turkey feast

If your oven breaks down on Thanksgiving morning this is what you should do.

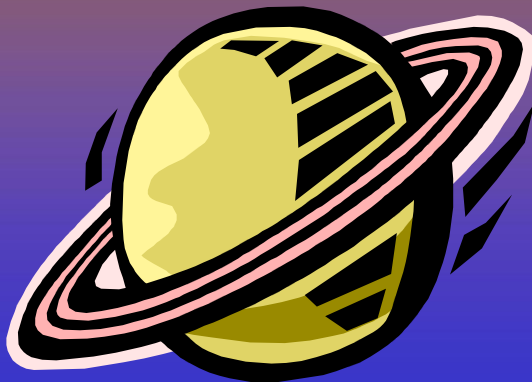

First turn your car into a space ship and fly to Saturn.

Next set it on Saturn and it will roast.

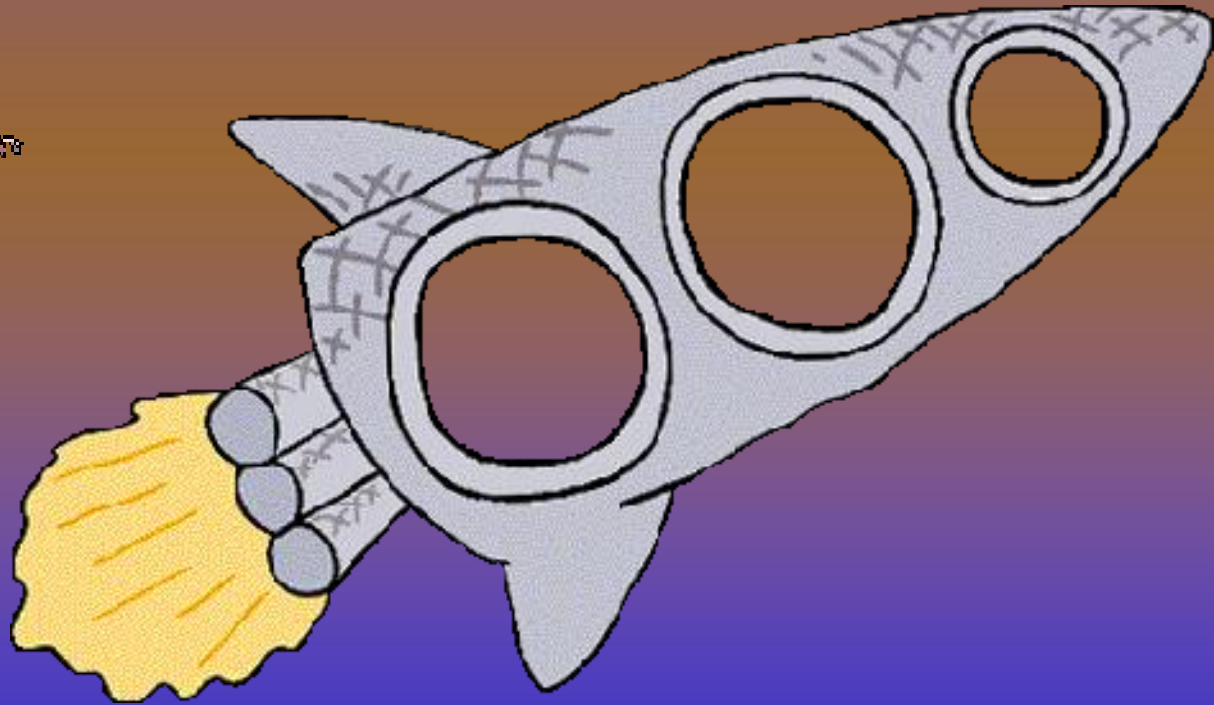

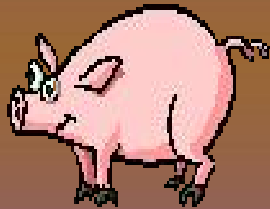

Then let it heat up real good.

After that it should be half roasted.

Finally it will be warm.

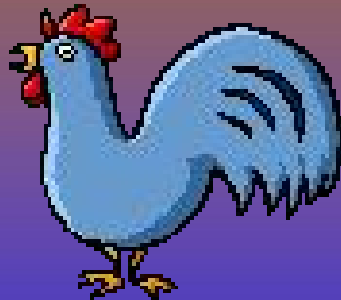

Make sure the temperature is  
5,000,000,000 degrees and cook it for  
hours 9,000,876,543 hours.

Before cooking add pepper,  
salt,seasoning.

Serve the turkey with  
pie,cranberries and salad.

The turkey will smell perfect.

Looks excellent.

and taste excellently great.
