

# A Good Thanksgiving

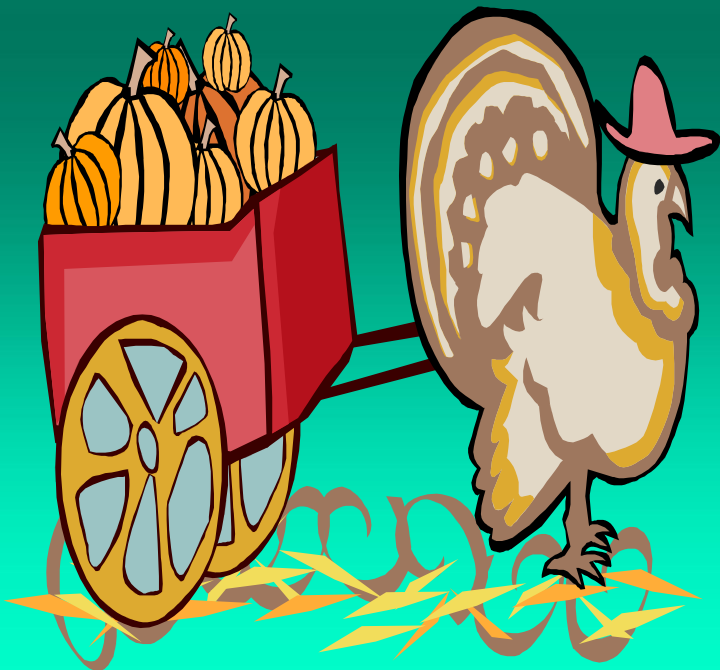

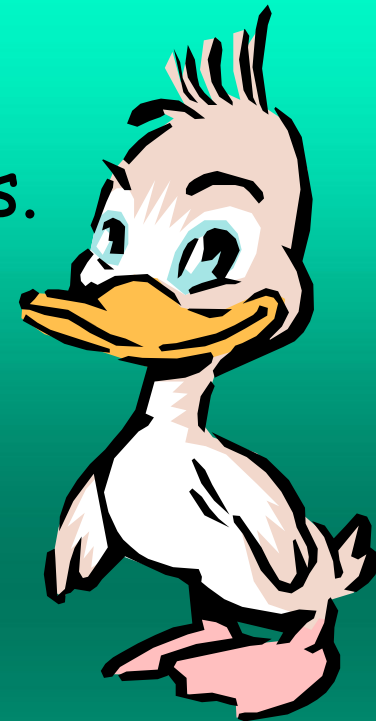

If your oven breaks down on Thanksgiving morning this is what you should do.

First go to your neighbor's house and beg to use their fireplace until they say yes.

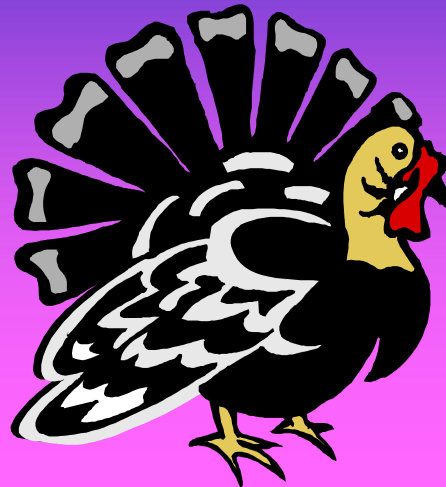

Next put a pot over it and get a turkey after that and cook it and have a good thanksgiving.

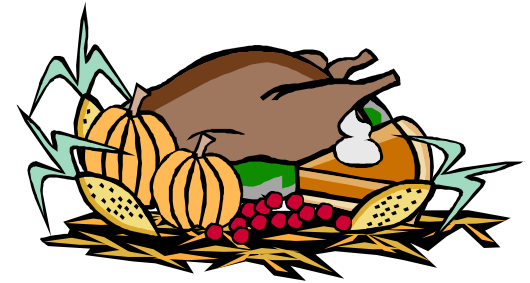

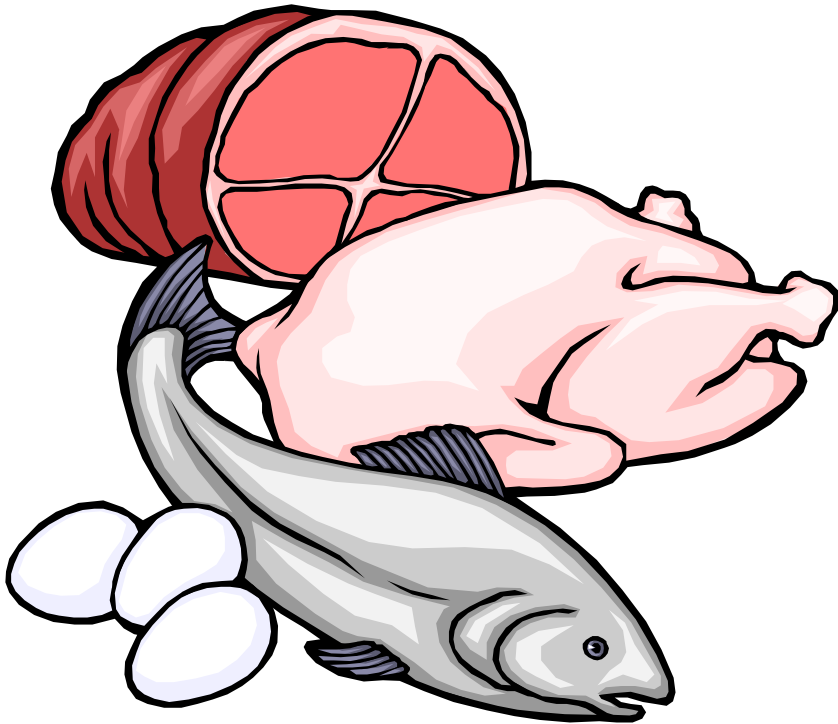

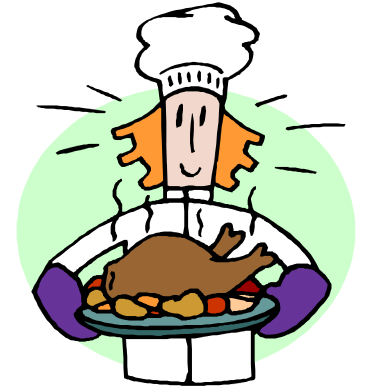

Make sure the temperature is 10,000  
Degrees and cook the turkey for 6 hours.

Before cooking add salad fruit and sugar.

Serve the turkey with pie, candy bags, fish, ginger, and bread.

The turkey will smell delicious

Look great and taste sweet and good.
