

Turkey

If your oven breaks down on Thanksgiving morning this is what you should do.

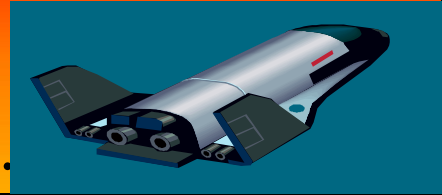

First catch a turkey, then build a rocket.

Next fly to Mars.

Then let the turkey fly around and
he will cook.

After that fly back to Earth.

Finally share it with your friends.

Make sure the temperature is 10,000,000 degrees and cook it for 1 minute.

Serve the turkey with stuffing and
mash potatoes.

Before cooking add pie, stuffing and
mash potatoes.

The turkey will smell good.

Look good.

and taste good.
