

# Grandma's Oven

If your oven breaks down on Thanksgiving morning this is what you should do.

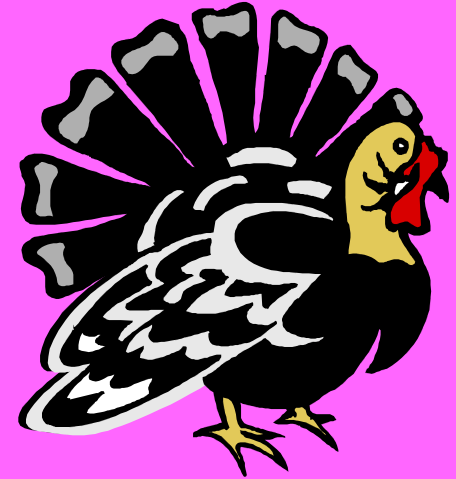

First use my Grandma's oven.

Next we put it in the oven.

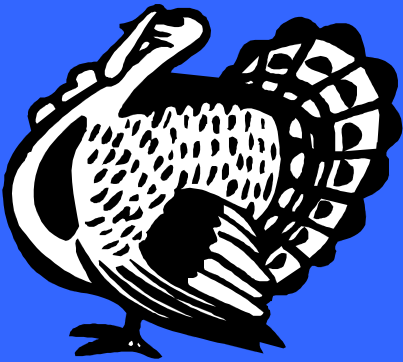

Then we make cookies.

After that we buy milk and water.

Finally the turkey is done.

Make sure the temperature is 117 degrees  
and cook it for 23 hours.

Before cooking add candy and cookies.

Serve the turkey with Candy and  
cake and cupcakes.

The turkey will smell Good

And taste Sweet

And look delicious.
