

# Ruby Throated Hummingbird

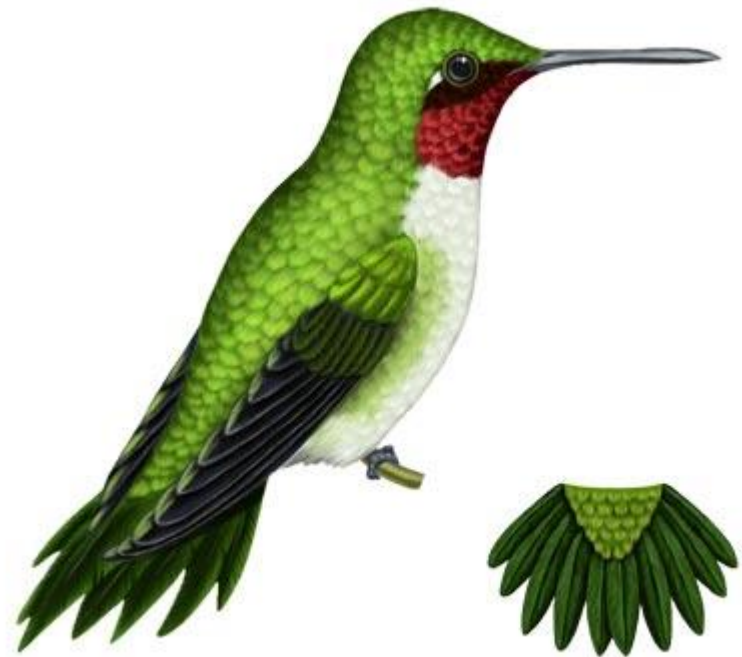

This bird is 4 inches tall. It looks like a colorful bird. It has a long beak to drink nectar. The hummingbirds colors are green and blue and red under his neck.

Its nest looks like a little cup placed on a branch and decorated with lichens. Lichens are a fungus that grow on rocks and trees.

It lays little tiny eggs.

The hummingbird eats flower nectar from flowers. They lay little eggs. They are very colorful.
