# Emperor Penguin

EMPEROR PENGUINS LIVE IN THE COOLEST CLIMATE ON EARTH. EMPEROR PENGUINS ARE THE LARGEST OF ALL PENGUINS.

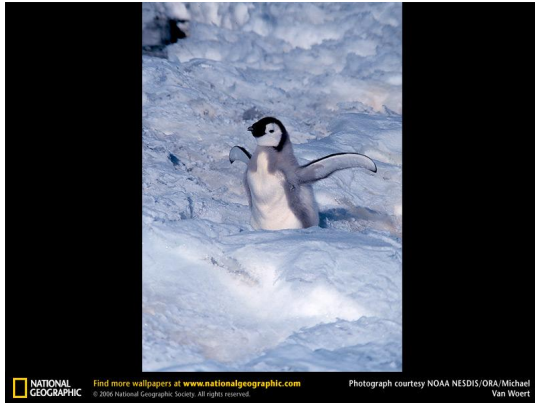

THEY LIVE AND BREED AT THE BEGINNING OF WINTER. AFTER MATING THE FEMALE LAYS ONE LARGE EGG. THEIR EGG IS THEN IMMEDIATELY ROLLED TO THE TOP OF THE MALES FEET. THE TOTAL POPULATION IS ESTIMATED TO BE ABOUT 200,000 PAIRS.

THEY HAVE SHORT WINGS THAT HELP THEM TO DIVE UP TO 900 FEET UNDER WATER TO CATCH LARGE FISH.

THEY CAN SWIM 10-15  
KILOMETERS AN HOUR  
WHICH LETS THEM ESCAPE  
THIR MAIN ENEMY THE  
LEOPAND SEAL.
